

# Technology Expert Labs for MaaS360

Whether you are new to IBM Security MaaS360 or have an existing installation you wish to expand, our Expert Labs team can provide a proven approach to planning, installation, upgrade or optimization of a MaaS360 solution.

## Business challenges

Essential to the zero-trust journey, IBM Security MaaS360 identifies, authenticates, authorizes, secures and controls devices so you can rapidly scale your remote workforce and bring-your-own-device (BYOD) initiatives.

Whether you need general advice in how to approach MaaS360 deployment, need expertise on a specific MaaS360 component, or need help reviewing pain points in an existing deployment, we can provide a subject-matter expert to assist you. Likewise, we can ensure you get ahead with compliance and adhere to best practice whilst ensuring you are getting the most out of new product features .

## Why use Technology Expert Labs?

Get paired with a trusted advisor who has the expertise to help your organization execute on its objectives with endpoint and mobile security to make certain you are identifying, authenticating, authorizing, and ensuring the compliance of endpoint devices in your network.

- Identify gaps in current deployment and operations and receive guidance for optimizing MaaS360 in your environment.
- Establish relationships with MaaS360 experts to enhance your zero trust capabilities and controls.

- Accelerate your MaaS360 installation or receive guidance and assistance with implementing a specific MaaS360 component in your target environment.

## What do we offer?

### Getting Started Services

Our expert consultants provide mobility implementation guidance to start using the software in less than a week.

### Mobility Training

Skill up helpdesk, operations team, and administrators on MaaS360 with mobility training workshops.

### Expanding Mobility Security

Quickly engage expert MaaS360 resources to achieve your top goals for anything related to MaaS360.

### Deployment ‘Health Check’ Services

Assess the current deployment against use cases, future goals, and industry practices in a half-day session. Concludes with a scored report and recommendations.
